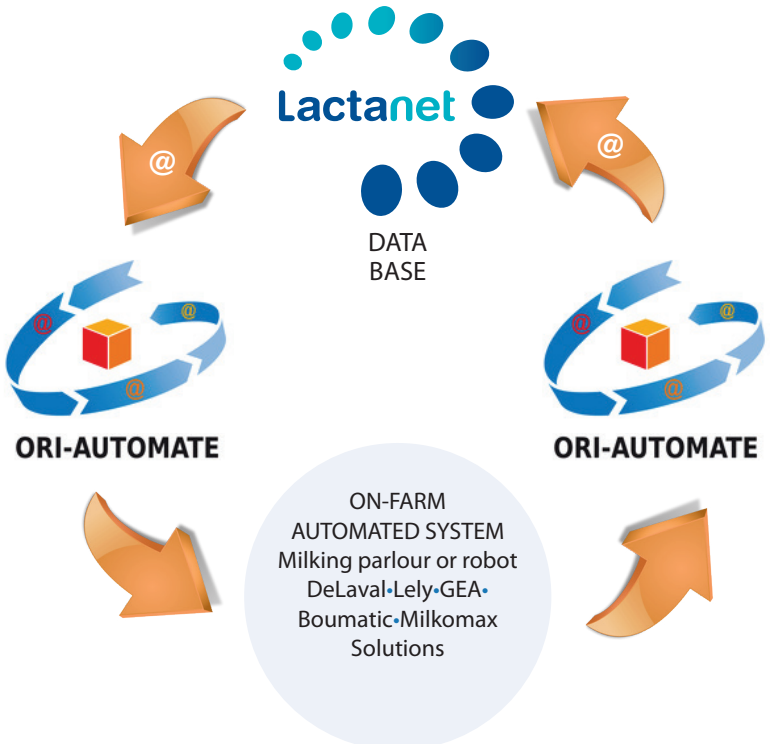
ORI-AUTOMATE

ORI-AUTOMATE
Your data transfer solution



Ori-Automate minimizes manual data entry in your milking system software

- Ori-Automate transfers milk composition data to your farm's computerized milking system. Therefore, you have only one software to refer to!
- Ori-Automate transfers milk recording data to your computerized system upon start-up of a new system.

Our team takes care of the installation!

Hassle-Free Installation

The installation is handled by the Lactanet IT Support Team. Internet access and the "TeamViewer" software are required in order to remotely install Ori-Automate.

Other pre-requisites

- The registration numbers must be converted to the 15-digit permanent identification numbers.
- All the permanent identification numbers must be identical in the computerized system AND in Lac-T/Vision2000.
- The computerized system must be equipped with the most up-to-date software version.
  - Boumatic HerdMetrix v5.0.0.13 (minimum) with active license HM PLUS CANADA
  - Lely T4C version 3.6.0.11
  - DeLaval Alpro 6.6/7.0, Delpro 3.5/4.5/5.0/5.1
  - GEA DairyPlan C21 v5.2
  - Milkomax Solutions Lely T4C version 3.6.0.11

For milk recording data transfer when starting up new systems

- Make sure that the above listed pre-requisites have been fulfilled.
- A notice of at least 5 business days is required to plan the transfer with Ori-Automate.

Low-cost benefits

- Annual maintenance fees of $131.50 apply on acquisition and on the yearly anniversary of the acquisition.
- If you already use Trans-D and are migrating to Ori-Automate, annual fees of $131.50 will apply on the date that is already in your system.

For the start-up of a new computerized system with milk recording data:

- A $40.50 charge for the historical data file + a $65/hour rate for the transfer apply. Annual maintenance fees of $131.50 also apply.
- Requires between 30 and 90 minutes if everything is in order.
