## WORD OF OUR CHAIRMAN

# THE PASSION TO DO MORE

### Isn't it what drives us all, dairy producers, to do more and to do better?

I travel the country and meet with dairy producers all over Canada. Most often, our conversation revolves around the same subjects: we share our thoughts about the future of the milk production industry and then we get down to our own farms and discuss the challenges that lie ahead. We always have plenty of ideas on what needs to be done to ensure that we move in the right direction. The way to go is not the same for everyone but two common denominators link all Canadian dairy producers together: the inescapable need for solidarity and the passion to do more.

We might feel overwhelmed at times, both on a national level as well as on our own farms. It would sometimes be easier to believe that our actions and words are not powerful enough to really make a difference. It might be simpler to say we don't have the time, and to put the burden of change onto others hands and choose to see any kind of result as a fatality. However, Canadian dairy producers are all the opposite! As entrepreneurs, we are used to managing responsibilities and facing important challenges. We are resilient and we believe that our passion and commitment to our industry can move mountains. Nowadays, we just can't afford to let go. No matter where we stand, dairy production is evolving and we must all work together to make the future bright. And by together, I mean dairy farmers along with all the industry stakeholders who share our concerns and who believe in the future of our great industry. And Valacta is certainly one of our most valued allies. We, as dairy producers and owners of our center of expertise, need to use this resource at its fullest potential if we want to succeed in doing more and doing better. Tools such as valuable statistics and benchmarks are the best assets to help dairy farmers be successful and to achieve their goals.

This edition of The Evolution of Valacta Atlantic Dairy Production is presented once again in a two-part format. First, this one: 2017 Stats, our most awaited annual statistics on publishable herds and cows! The second publication, 2017 Stats and Tips which will be available in May, will feature provincial statistics, benchmarks and hot articles written by our experts. And because we are always on the move and busy doing more, both versions are mobile friendly so you can enjoy us anywhere, anytime!

I'm very proud of all the 2017 top herds and want to take this opportunity to congratulate every one of them. Their passion to do more and to do better is inspiring in every way and helps to pave the way to a brighter future for all of us.

Enjoy your dairy evolution!

PIERRE LAMPRON

Dairy Producer,  
Chairman of Valacta

## IT'S SIMPLE MATH

THE AVERAGE COST  
OF CLINICAL MASTITIS  
PER CASE HAS BEEN  
EVALUATED AT US\$444.<sup>1</sup>

Almost 1 in 4 cows suffer  
from clinical mastitis each  
lactation cycle and coliform  
bacteria are frequently the  
cause.<sup>2</sup>

## WORD OF JEFF GUNN, REGIONAL MANAGER

We are pleased to present Part 1 of the 2017 Valacta Annual Report. In the following pages, you will find the annual statistics for the herds in Atlantic Canada enrolled on milk recording. I want to start by congratulating Philip & Lori Vroegh and family at Sunny Point Farms in East Noel, NS, who finished with the top Herd Performance Index (HPI) in Atlantic Canada and in the Top 25 herds in all of Canada! Congratulations also to the Visser family of Winding River Farms of MacKay Siding, NS, who finished second for HPI and the top robot herd in Atlantic, and to Murray and Dalyce Holman of Middle Musquodoboit, NS, who finished third in Atlantic and the top tie-stall herd for HPI. Congratulations also to the top three herds in each of the Atlantic Provinces who were announced back in early February. Judging by the scores, it is obvious that Atlantic herds are paying closer attention to the six herd performance parameters that make up the HPI.

To conclude, I want to thank Denis Cyr (NB) and Matt Brosens (NS), our two Atlantic representatives on the Valacta Board of Directors. Their support and insight are much appreciated. Sincere thanks are also extended to the various industry partners who we continue to work with on a regular basis, for the betterment of the entire industry. I also want to acknowledge our Valacta team, who I have the pleasure of working with each and every day. Your passion and commitment to the dairy industry is contagious. Finally, thank you to our customers, the dairy producers of Atlantic Canada. The resiliency, dedication, hard-work and positive outlook you demonstrate, day-in and day-out, is unparalleled. I look forward to all that we can accomplish together in this great industry in 2018.

Happy reading...

### VACCINATE YOUR HERD AGAINST CLINICAL COLIFORM MASTITIS WITH ENVIRACOR® J-5.

#### A 3-dose vaccination program with enviracor j-5 leads to:

- › Up to an 80% reduction in clinical coliform mastitis<sup>3,4,5</sup>
- › Up to a 41% reduction in the duration of clinical mastitis in cows that get sick<sup>6</sup>
- › Extended protection throughout the first 100 days of lactation<sup>3,4,5</sup>

TO FIND OUT HOW ENVIRACOR J-5 CAN HELP YOU PREVENT CLINICAL COLIFORM MASTITIS IN YOUR HERD, TALK TO YOUR VETERINARIAN.

# TOP 25 HERD PERFORMANCE INDEX IN CANADA

**The Herd Performance Index allocates points for performance in six different management areas and is an excellent barometer of overall herd performance. It is a great tool for monitoring progress from year to year and also allows herds to benchmark themselves against others.**

We congratulate the following which have achieved superior performance across all aspects of herd management.

**There is big money involved in dairy production planning!**

*The quota constitutes the most important part of a dairy farm's market value.*

## Ask your technician about PLANI-LACTA or call 1-800-266-5248

### What does it do for you?

- Keep track of pregnancies, animals entering or leaving the herd, and the true output from your cows.
- Get a precise estimate of total milk production in the coming months.
- An ideal way to anticipate problems and find solutions before they arise.
- A flexible tool to help you to optimize the use of quota over the course of the year.

### Dairy production planning is like driving a car!

You keep your eyes on the road a good distance ahead of you and you make frequent small adjustments instead of making sharp turns, accelerating at the last minute and slamming on the brakes. All things considered, it's less stressful, much safer and somewhat easier on the pocketbook!

valacta

**“As my Valacta advisor, Stirling assists me in interpreting my Valacta test day data. Understanding this data is the first step towards increasing my profitability, by increasing milk, fat and protein production. ”**

Dr. Stirling Dorrance,  
Dairy Production  
Advisor  
**902-300-5486**

## Ways we accomplish this:

- Improving dry cow management and transitions
- Optimizing calving interval and improving reproductive indices
- Optimizing heifer inventory
- Achieving ideal age for heifers at calving
- Lowering SCC and incidence of metabolic diseases
- Improving the comfort and longevity of animals

“All of this allows me, as a dairy producer, to more effectively use the numbers to monitor herd performance and health, maximizing profitability.”
