WORD OF JEFF GUNN, REGIONAL MANAGER

## DAIRY FARM LEADERS, STAY TUNED!

It is my pleasure to introduce Part 1 of the Valacta 2018 Annual Report, *The Passion of Business Leaders*. As the title of this publication suggests, operating a dairy farm IS running a business, and we are seeing more and more that our business leaders are hungry for the data we provide to help them more effectively do this.

We, at Valacta here in Atlantic, continue to make data quality a key focus of what we do. We recognize that farm leaders need accurate data to make decisions in order to draw the correct conclusions, and identify solutions. As such, we continue to develop our advisory services here in Atlantic. Valacta has experts in all aspects of dairy herd management, and our goal is to bring more of this expertise to our team on the ground here and to you. Our approach is still to be working together with other industry experts on-farm here in Atlantic, but we are being asked to do more for our customers. Currently, we are working with close to fifty herds today in Atlantic to provide timely, relevant advisory service, and we believe there is much more to do. Stay tuned!

Another focus of ours during this digital transformation era is the collection, exchange and management of the data. Given the rapid rise of on-farm technology, it is critical that we capture on-farm data as efficiently and accurately as possible. We offer robot technical

and advisory services and have retained more than 90% of Valacta herds who have installed robots. Valacta is involved at a national level to develop new service options for herds with electronic and automated milking systems, ensuring that we meet their needs and budget. These new service options will be launched in the coming months. Stay tuned!

I want to take this opportunity to congratulate the top Herd Performance Index herds in Atlantic for 2018. Alan and James Cook, of Lone Willow Farm in Bridgetown, Nova Scotia finished 16th in all of Canada which is an impressive achievement. I also want to congratulate Logan Jewell of Jewell Dale Farm Inc., Josiah and Joy Weir of Jolly Farmer Products, and Jeff and Olive Greening who finished as the top HPI herds in Prince Edward Island, New Brunswick and Newfoundland, respectively.

In closing, we look ahead to 2019 with excitement when we consider the calibre of the Atlantic dairy industry. We know challenges lie ahead, but we are all in this together. Partnerships are key, and we will continue to work with other industry partners to offer the Atlantic Dairy Calendar, and ProAction support services. As I work in this great industry, I am struck by the passion, positivity and resilience our business farm leaders demonstrate every day. We will be there with you every step of the way.

# TOP 25 HERD PERFORMANCE INDEX IN CANADA

**The Herd Performance Index allocates points for performance in different management areas (including milk value, udder health, reproduction, heifer rearing and longevity) and is an excellent indicator of overall herd performance. It is a great tool for herds to monitor their progress from year to year and also allows herds to benchmark themselves against others, including within their unique production system (free stall, tie stall, robotic, organic).**

We congratulate these producers, whose sustained efforts have led to an outstanding performance.

# IT'S SIMPLE MATH

THE AVERAGE COST OF CLINICAL MASTITIS PER CASE HAS BEEN EVALUATED AT US\$444.<sup>1</sup>

Almost 1 in 4 cows suffer from clinical mastitis each lactation cycle and coliform bacteria are frequently the cause.<sup>2</sup>

## VACCINATE YOUR HERD AGAINST CLINICAL COLIFORM MASTITIS WITH ENVIRACOR® J-5.

A 3-dose vaccination program with enviracor j-5 leads to:

- › Up to an 80% reduction in clinical coliform mastitis<sup>3,4,5</sup>
- › Up to a 41% reduction in the duration of clinical mastitis in cows that get sick<sup>6</sup>
- › Extended protection throughout the first 100 days of lactation<sup>3,4,5</sup>

TO FIND OUT HOW ENVIRACOR J-5 CAN HELP YOU PREVENT CLINICAL COLIFORM MASTITIS IN YOUR HERD, TALK TO YOUR VETERINARIAN.

valacta

**“ As my Valacta advisor, Stirling assists me in interpreting my Valacta test day data. Understanding this data is the first step towards increasing my profitability, by increasing milk, fat and protein production. ”**

Dr. Stirling Dorrance,  
Dairy Production  
Advisor  
**902-300-5486**

## Ways we accomplish this:

- Improving dry cow management and transitions
- Optimizing calving interval and improving reproductive indices
- Optimizing heifer inventory
- Achieving ideal age for heifers at calving
- Lowering SCC and incidence of metabolic diseases
- Improving the comfort and longevity of animals

“All of this allows me, as a dairy producer, to more effectively use the numbers to monitor herd performance and health, maximizing profitability.”

[www.valacta.com](http://www.valacta.com)

**There is big money involved in dairy production planning!**

*The quota constitutes the most important part of a dairy farm's market value.*

## Ask your technician about PLANI-LACTA or call 1-800-266-5248

### What does it do for you?

- Keep track of pregnancies, animals entering or leaving the herd, and the true output from your cows.
- Get a precise estimate of total milk production in the coming months.
- An ideal way to anticipate problems and find solutions before they arise.
- A flexible tool to help you to optimize the use of quota over the course of the year.

### Dairy production planning is like driving a car!

You keep your eyes on the road a good distance ahead of you and you make frequent small adjustments instead of making sharp turns, accelerating at the last minute and slamming on the brakes. All things considered, it's less stressful, much safer and somewhat easier on the pocketbook!
